Education

Name of university: National University of Food Technology

Specialty: Technologies of fermentation and winemaking products

- 2007 - 2011 bachelor's degree
- 2011 - 2012 master's degree

About me

During my work as a QA engineer, I was able to gain valuable experience in software testing. My passion for details and technical precision helped me to identify and fix defects, ensuring the high quality of the product.

I am ready to use the knowledge and skills I have gained to reach new heights in the QA industry, as well as to continue to improve my expertise to ensure excellent software quality." I like to check software products, search for bugs, watch for program behavior, and create testing documentation. I am looking for a new job because I want to work in a team with real communication with team members, develop my testing skills, familiar with new testing tools, develop myself in this area, and make products better.

I will be glad to participate in the creation of high-quality products, to work and make friends with team members and learn something new.

Languages

- English - Upper-Intermediate (B2) level
- Ukrainian - Native Speaker

Skills

- Basic knowledge of HTML, CSS, MySQL;
- Chrome Developer Tools;
- The theory of software testing (understanding of SDLC and STLC, testing types, levels, and methods);
- Experience with QA documentation: checklists/test cases/bug reports;
- Knowledge of QA methodologies and approaches (Agile (Scrum, Kanban) model, Iterative model, Waterfall model, Spiral model);
- Experience with different test design techniques in creating test cases and checklists (Equivalence partitioning, Boundary value analysis, Decision table, State transition, Use case testing, Pairwise testing, Error guessing, Exhaustive testing);
- Knowledge of using a bug-tracking system (JIRA);
- Knowledge of API testing (Postman, SoapUI);
- Experience in testing web applications;
- Worked in Fiddler, Charles Proxy, collecting logs;
- Experience with TestRail (Test Cases);
- Experience with evidence tools: Snagit 2023, VSDC Free Video Editor, Win Screen Recorder, TechSmith Capture;
- Pairwise Tools: Pairwise Online Tool <https://pairwise.teremokgames.com/>
- Basic knowledge of Git, GitHub, Git BASH

Work History

• 2013-2023 **Yeast plant "Enzyme Company" Full-time**
Dispatcher (Technologer IV rank) of the wastewater treatment plant section

My responsibility:

Watching technology process, documentation management, adding progressive solutions for improvement technology processes, and simplification of working conditions.

• 2023 - Present **uTest**

Since January 2023 I began to study at uTest Academy. After successful completion of the training, I continue to work on this platform until now.

My responsibility:

- Analysis requirements;
- Searching for bugs;
- Writing test documentation (bug reports, test cases, checklists);
- Working with different tester's tools.

My achievements

- I received a "Bronze" tester status at uTest platform;
- Having many written bug reports, test cases, and checklists;
- Real experience with searching for bugs in websites, mobile applications;
- Took part in different test cycles.
